About AIV

Who We Are

AIV, Inc. founded in 1983, is a privately-owned medical equipment support corporation located just outside of Baltimore, MD. AIV began by repairing hospital dialysis machines, then in 1993 branched into medical equipment repair for the acute care hospital industry and later in the veterinary industry.

AIV now supports more than 1,000 veterinary clinics with specialized repair services and patient-ready infusion pumps. By utilizing AIV-manufactured replacement parts, we are able to help lower the cost of maintaining patient care equipment and keep your equipment in peak condition.

We specialize in infusion pump repair, the sale of patient-ready infusion pumps, and infusion pump related parts such as power cords and AC adapters. AIV has also manufactured the PowerMATE®, a relocation power solution and the IVetMATE IV fluid warmer.

Certified and Regulated to Give You Confidence

All AIV repairs, parts, and accessories are subject to rigorous quality control standards to support your internal risk management programs. AIV is committed to continuous quality improvement and is presently ISO 13485:2016 certified.

Working with an Old Pump? No Problem!

Our End of Life Infusion Pump Support has You Covered

A cornerstone of AIV's business is the support of infusion pumps deemed "End of Life" (EOL) by the Original Equipment Manufacturer (OEM). We offer repair services for these EOL pumps for a minimum of five years after the OEM stops supporting them.

Equipment Repair

Flexible Repair Options to Better Suit Your Budgeting Needs

All AIV repairs are performed in our ISO 13485:2016 certified facility to strict quality standards. Infusion Pump Repairs include a 6-month warranty and the Stryker TPump repair includes a 90-day warranty. We offer both flat rate, all inclusive pump repairs and fixed-rate (parts extra) labor repairs to better suit your budgeting needs.

IVetMATE IV Fluid Warmer

Reliable & Accurate Fluid Warming

Say goodbye to unreliable fluid warming methods when you upgrade to the most accurate, reliable, and affordable fluid warmer on the market!

- Easily hangs from an IV pole or cage
- Slim design and rubber feet allow unit to lay flat
- Strong magnets keep the door closed during use
- 10 foot power cord

AIV Part Number	Description
VM138000	IVetMATE Fluid Warmer
AC13761	Replacement AC Cord

Optimal Distance from Exit of the Warmer (T = 100-98°F / 37°- 36°C)

Rate, ml/hr	Inches
35	4.5-5
50	6.5-8
75	10-11
100	12-14
150	15-17
200	17-20
300	16-20

The IVetMATE is a dry-heat device designed to safely warm fluids through a heating plate. It has been tested to provide the most accurate information on fluid temperature in relation to flow rate and distance from the exit of the warmer.

Easily visible chart on the front of the device helps the user by defining flow rates and distances.

For Veterinary Use Only.

1 YEAR WARRANTY

Industrial PowerMATE®

Safe & Convenient Access to Outlets

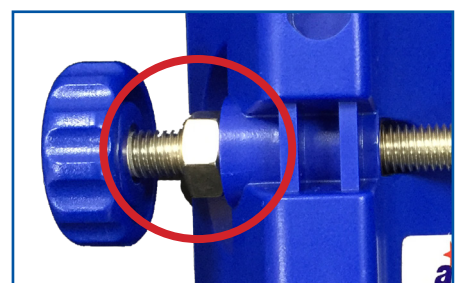

AIV's versatile power relocation solution, provides cord management and increases equipment mobility.

AIV Part Number: PS11610

- **Mounts on a pole, wall, or leg of a cart**
- **Attaches and detaches in seconds and requires no tools**
- **15 foot cord to increase equipment mobility**
- **UL962A Listed**

Angled surface allows for connection of 3 wall mount AC adapters and in-line plugs simultaneously.

Hex nut is included with each item and can be used to semi-permanently affix this item to a pole.

VetroCRI Syringe Pump

The Easiest Constant Rate Infusion Pump

Your drip counting days are over! AIV's new pump has been created for ease and support so you don't have to deal with the dread of IV drip counting.

AIV Part Number: VM14075

- **Battery Operated** (batteries included)
- **Visual and Audible Alarm for Occlusions**
- **Lay Flat, Hang on IV Pole, or Attach to Cage** (cage clip included)
- **Use with Many Popular Syringes**
BD, Monject, and generic branded syringes of various sizes (5-60cc).

The VetroCRI is the perfect syringe pump for all vet clinics, whether this is your first constant rate infusion pump, or you've been using them for years. This easy to use syringe pump is designed for controlled continuous administration of IV fluids and does not require software to operate.

Compliant with IEC 60335-01 • For Veterinary Use Only

Accessories

AIV offers its own line of power cords and AC adapters to complement your infusion pump system. All new power cords and AC adapters are engineered and manufactured by AIV following strict quality control standards to safely meet your infusion needs and reduce the cost of owning and supporting infusion pumps.
